

ELECTRONICMAZE

BRIEF DESCRIPTION:

Are you interested in solving puzzles? Are you interested in programming? Are you interested in circuit solving? If you can make wonders with these skills this is the right platform to show your talent

STRUCTURE OF THE EVENT:

The event will be conducted in three phases.

- **Round 1:** This round is made to test your basic knowledge in electrical and electronics engineering. Put together all the old school stuff and run through your basics, for they will be your rightful companion to get you out of the maze.

- **Round 2:** This is to test your thinking power and circuit making power. In this round you will be given a circuit and you have to modify the circuit to get the output.

- **Round 3:** This is to test your knowledge in circuit solving and logical thinking. By combining all these clues you have to trace out a word.

RULES:

- Maximum number of members allowed in a team is four.
- Each round will be given a particular time limit and that should not be exceeded.

JUDGING CRITERIA:

On the basis of speed and accuracy of the teams traced the word. Organizers reserve all rights regarding the declaration of winner. No objections in this regards will be entertained.

INSTRUCTIONS:

- Participants should be present at the spot before 15min.
